Q&A

SAP Business Technology Platform.

A centerpiece of our corporate strategy

SAP Integration Strategy

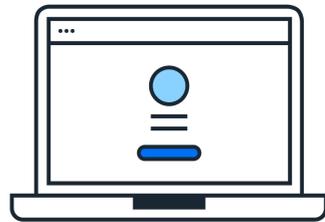

Suite qualities: One workflow inbox

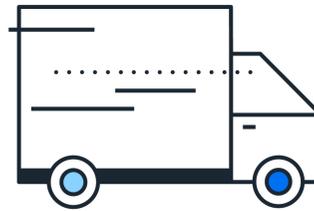

Customer demands towards integration aspects

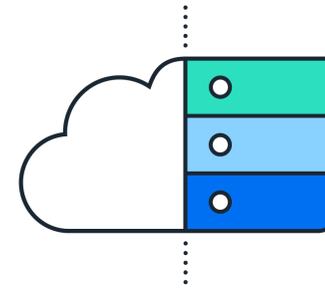

Aligned domain models and integration content

Seamless user experience across all SAP solutions

Out-of-the-box integrations

Sustained high-quality of master data

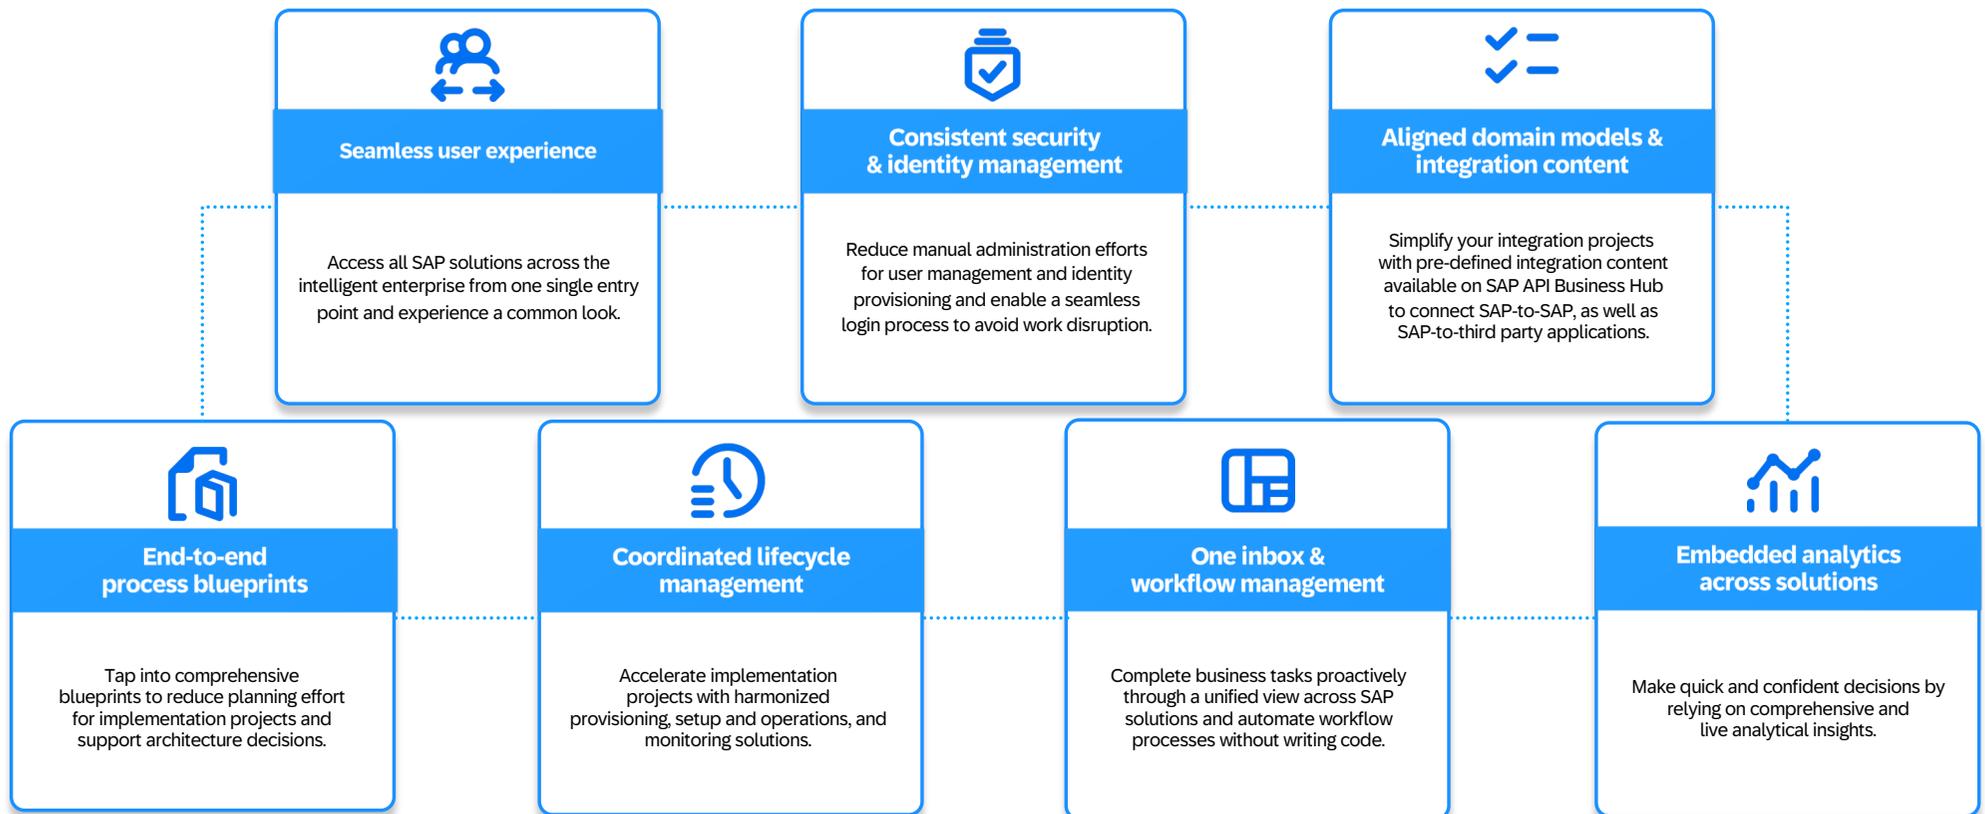

Consistent security and identity mgmt.

Suite Qualities

Suite qualities - Overview

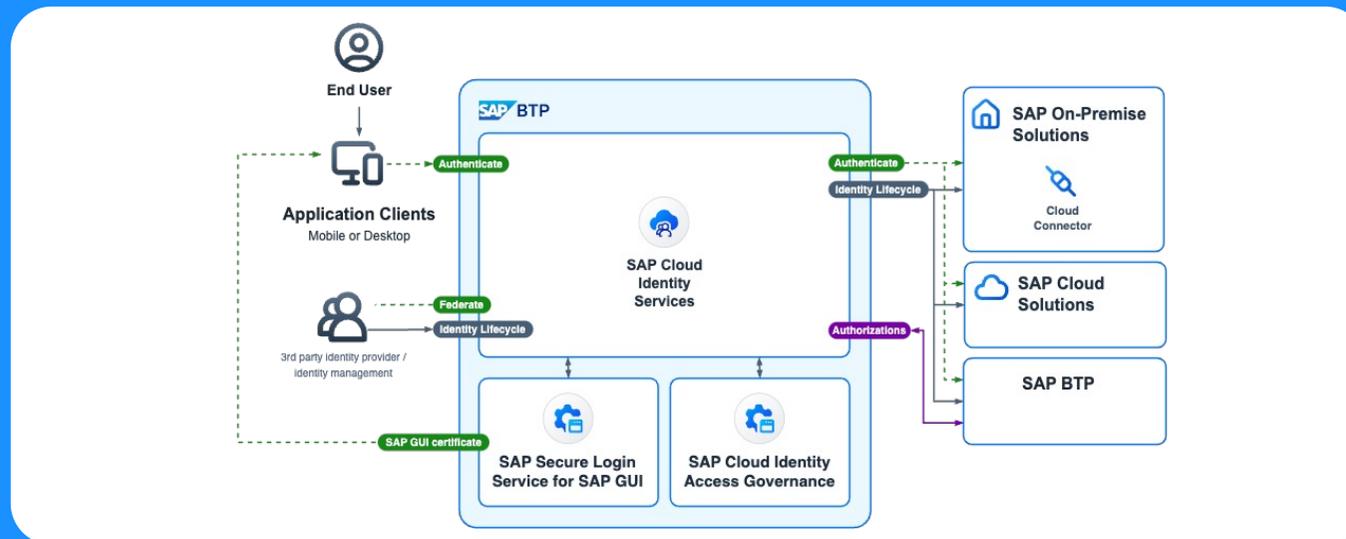

Implemented across end-to-end business processes delivered by SAP Business Technology Platform to unify user experience, security, workflow inboxes, data semantics, analytics, lifecycle management, and process architectures.

Consistent security and identity management

Enabling of single-sign-on and identity provisioning throughout your application landscape

Motivation

Customers require seamless end-to-end authentication and identity provisioning mechanisms

SAP offers

A consistent and centrally administered user management for identity authentication and identity provisioning through SAP Cloud Identity Services.

Suite qualities

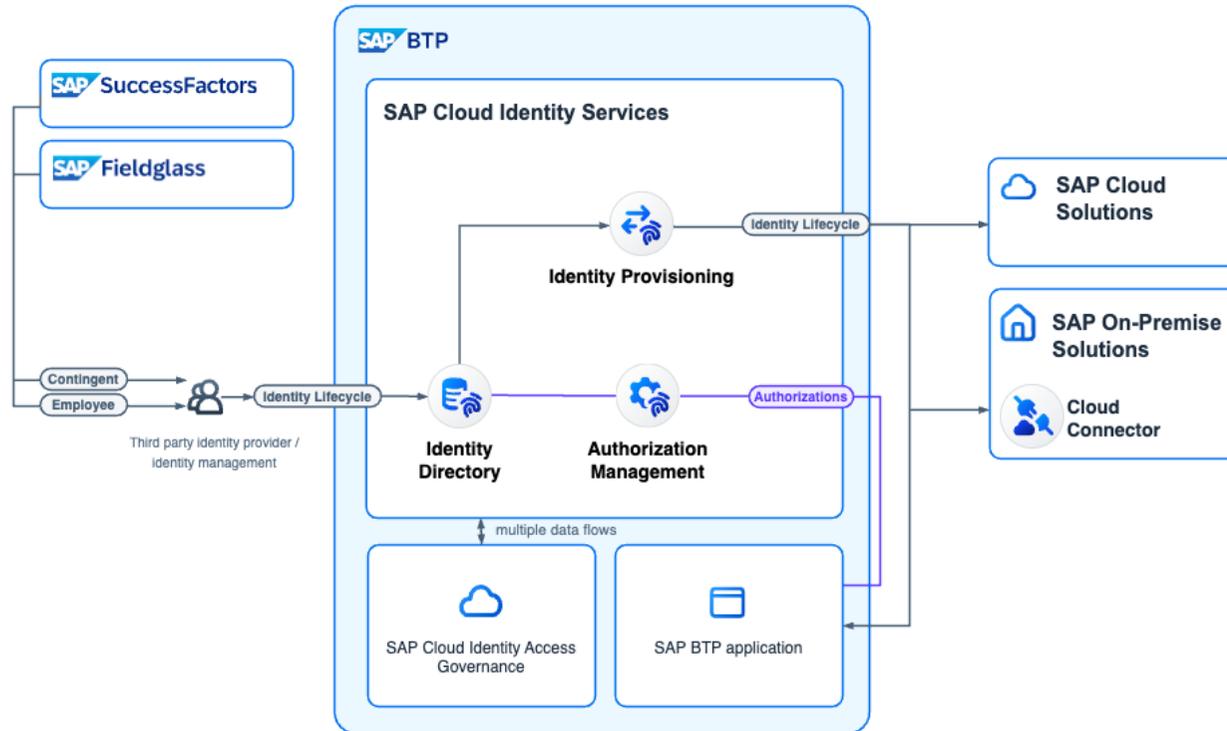

Consistent security & identity management – identity lifecycle

Consistent security & identity management

Reduce manual administration efforts for user management and identity provisioning and enable a seamless login process to avoid work disruption.

Identity lifecycle with SAP Cloud Identity Services- SAP BTP Solution Diagram

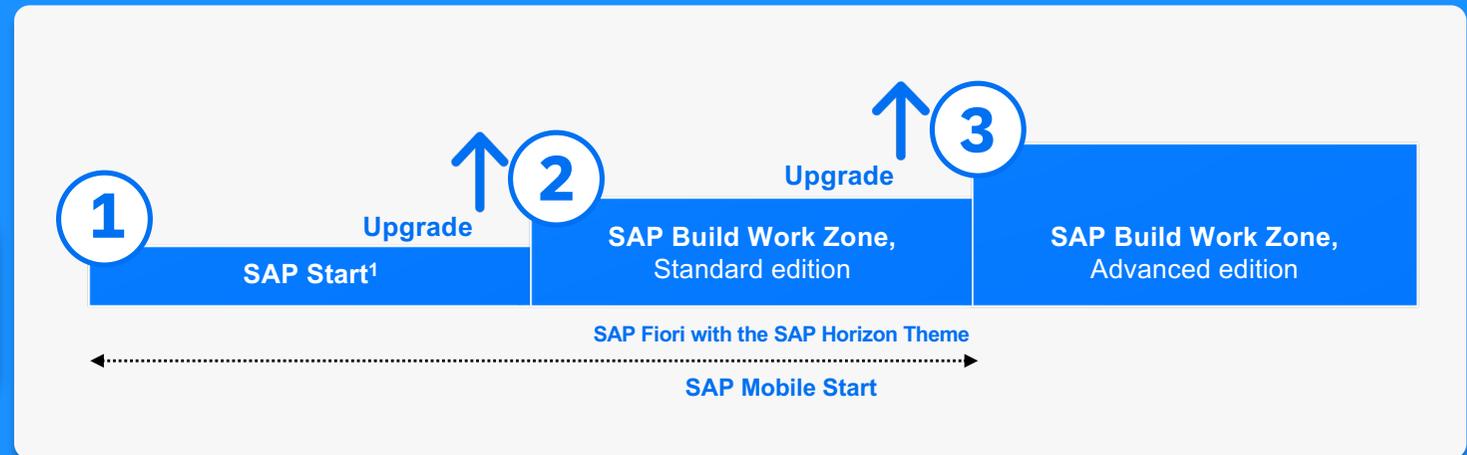

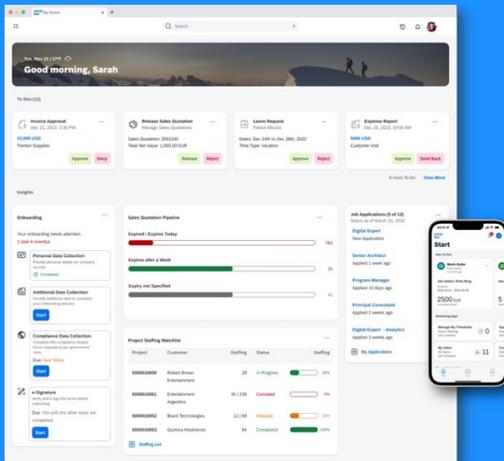

Legend

- Authorization
- Identity Lifecycle
-  Service
-  Data Flow
-  Mutual Trust

Seamless user experience

A modular offering for the central entry point from SAP

Motivation

Whenever a certain business task spans across multiple products or applications, users want to directly navigate to the next application accessing relevant business data and launch applications via a central entry point

SAP offers

A pre-configured homepage (SAP Start) for cloud solutions from SAP to access apps and tasks from the connected systems including pre-configured cross-application business content – which can be easily extended / upgraded (SAP Build Work Zone std. edition) to hybrid scenarios, integrating additional LC/NC apps, custom branding – and then further (SAP Build Work Zone adv. edition) enhanced capabilities for content management, team workspaces and 3rd party solution integration (MS TEAMS) plus the ability to create and publish own content.

Suite qualities

Seamless user experience

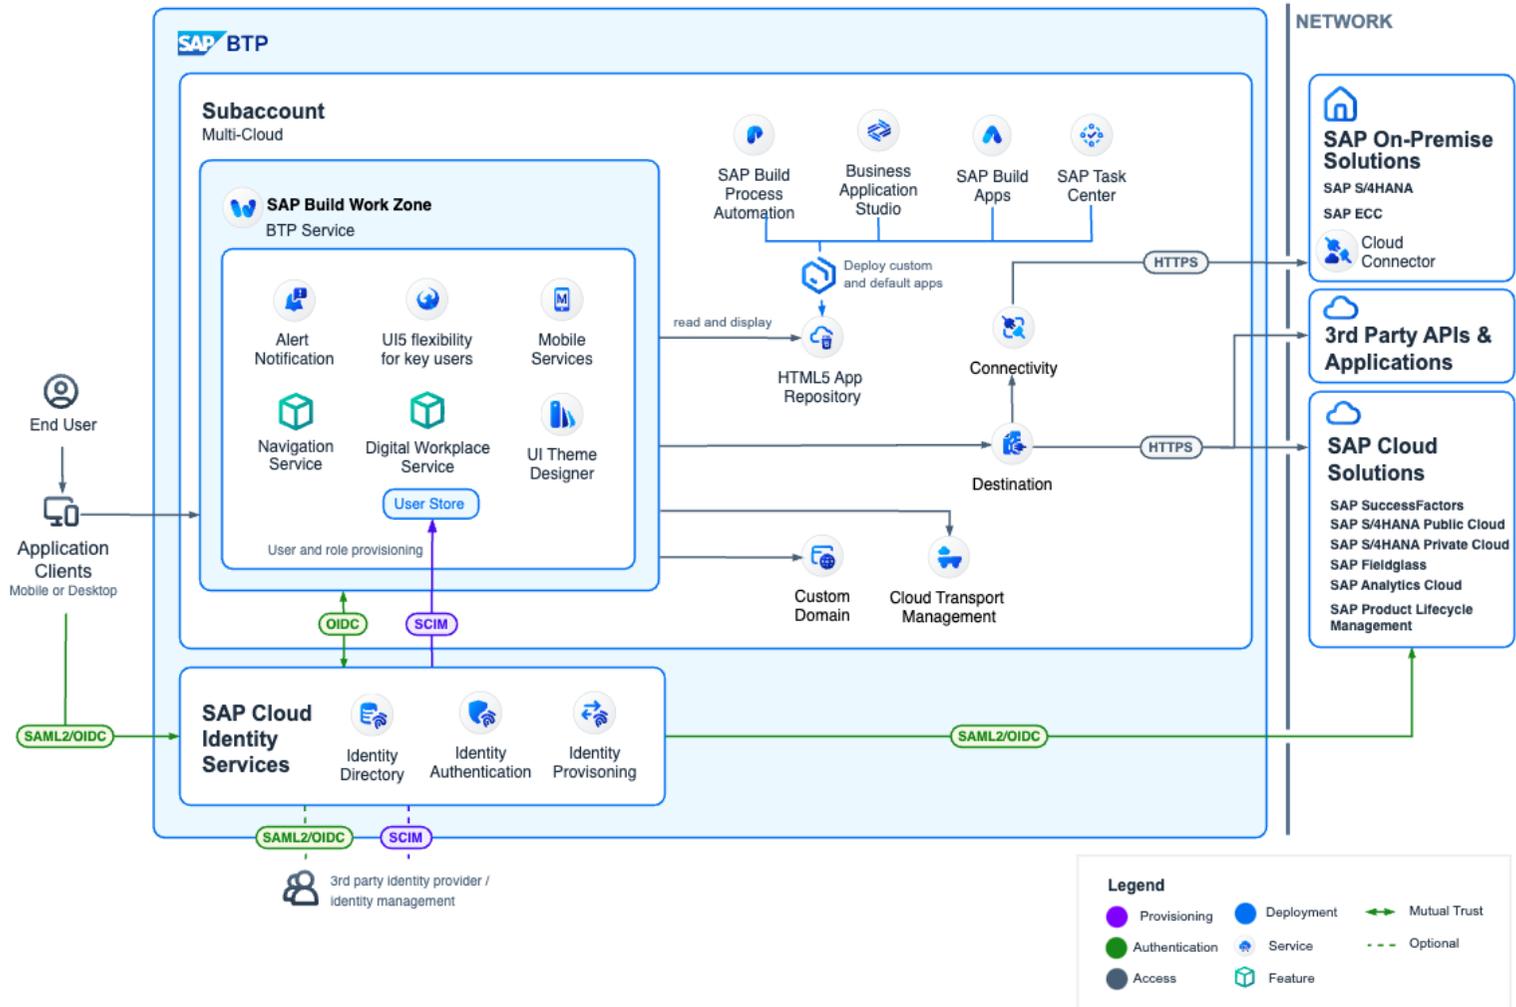

Seamless user experience

Access all SAP solutions across the intelligent enterprise from one single entry point and experience a common look.
